

GWAS summary statistics (for MPB traits)

Continuous | M shape | O shape | U shape

**1000G
Genome
projects
Phase 3**

2,504
samples

Step 1

1,217 phenotype-specific COJO lead variants

Step 2

675 non-redundant independent MPB loci

Step 3

LD-defined core risk haplotypes

Step 4

583 informative core haplotypes retained

Step 5

Archaic genome allele matching

Step 6

76 archaic-matching candidate loci

Step 7

Diagnostic variants and YRI filtering

Step 8

5 reported archaic-like MPB haplotypes
